

# MAISRASSEN EN MAISMESTSTOFFEN 2018

Mais is een essentiële schakel in Terra+, de totaalaanpak van ForFarmers voor meer melk uit ruwvoer. Een juiste rassenkeuze en bemestingsstrategie draagt direct bij aan een verhoging van het rendement uit uw eigen voer. Deze folder biedt u het overzicht van het assortiment voor 2018. Onze specialisten, accountmanagers en dealers helpen u graag om de beste keuze te maken voor uw bedrijf.

## Keuzeschema maisrassen melkvee

Kies het juiste ras voor uw teeltdoel met behulp van ons keuzeschema.

\* MELK = Meer Energie Lacterende Koeien, energiewaarderingsysteem van ForFarmers.

- Voor het korrelmais en/of CCM segment heeft ForFarmers het dubbeldoelras Millesim beschikbaar met uitstekend cijfers voor korrelopbrengsten.
- Veelbelovend ras: Iconico, voor maximale zetmeel opbrengst.

\* **GroMaize Opticoat 30-0** is een nieuwe generatie rijenmeststof voor mais. Het bestaat deels uit omhulde stikstof die gecontroleerd vrijkomt op het moment dat de plant er behoefte aan heeft. Dit resulteert in een hogere drogestofopbrengst en minder uitspoeling naar de bodem.
